

Emneevaluering fra emneansvarlig

Emnekode: PSYK302G

Navn på emne: Culture and Psychopathology; Mental Health in a Cross-Cultural Perspective

År/semester: Spring semester 2023

Emneansvarlig: Michalis Lavdas, David Sam

Egenevaluering:

Hva har fungert godt dette året og hva har ikke fungert så godt?

The course responsible for this course is Prof. David Sam who has been systematically delivering this course, developing the core of the material used for this years' course as well. Administration responsible was Mirza Mujic that helped provide important administration support for the course. It's important to further coordinate this course with the rest of the courses students might be attending and to keep providing an important teaching experience on a subject that is often overlooked in Psychology Curricula internationally (Cultural awareness, Indigenous mental health, Refugee mental health etc.).

Hvordan tenker du det kan forbedres og gjøres annerledes neste gang emnet går?

Next year course will take place led by Prof. David Sam. Mitt UiB will still be part of the course where interaction with students can take place and works well with the combination of face-to-face courses.

Øvrige kommentarer

We want to sincerely thank the students for actively participating in the evaluation and providing substantial feedback.
