### 3. Egenevaluering/Self assessment

*Vurdering av undervisningsopplegget i forhold til mål og resultater (emneansvarlig)*

*Assessment of the teaching plan in relation to goals and results (course coordinator)*

As the course coordinator, I have thoroughly reviewed the teaching plan in relation to the goals and results of the course. Overall, I am pleased with the alignment between the plan and the desired outcomes. The teaching plan effectively addressed the specific goals set for the course. First, the course requires students to complete readings before class for further discussions during the class, and then the lecture(s) can clarify the readings and theories used in them (assuming that master students are prepared and aware of the readings). Second, the plan incorporates a variety of case studies for weekly group work, which includes a balanced mix of lectures, discussions, and practical exercises. By employing these different approaches, the teaching plan encourages active participation and fosters critical thinking among students, which are crucial skills for their overall development.

*Oppfølging av/kommentarer til tidligere evalueringer. Hvordan rapporten følges opp, evt. tiltak eller endringer som er gjort/planlegges gjennomført på bakgrunn av emnerapporten/ / **What adjustments to the curriculum would you recommend for the next time the course will be offered?***

Although students complain that each of them must contribute to the class discussion, at the master's level, I believe prioritizing the enhancement of active student engagement is necessary. Therefore, I would recommend incorporating more interactive activities, such as group projects, discussions, and hands-on exercises, into the curriculum.
