Emneansvarligs evaluering / The course coordinator's evaluation

The course went quite OK taking into account that this is the first time it is being run. I believe that the course has saved lots of time for the admin since students have had the time to come up with master project ideas. Some groups communicated with their students better than other groups, and this should be improved. But overall, it seems that students have already had a start on their master's projects which will hopefully let them to having an overall better master's experience.

Mål for neste evalueringsperiode - forbedringstiltak? / Goals for the next evaluation period - what can be improved?

Maybe a bit more clear structure should be given to the groups, as some groups filled their students' time with activities, and other groups were more hands-off.
