What do you think was the best thing about this course?

- Hands on training on practical and also application of the subject to owns project
- To get some practical training.
- Practical training
- The practic-part, marking of the fish and such
- The practical work was the best part
- Practical excersises
- Learning to treat fish in practice.
- the practical exercise (tagging)
- Audrey was good
- 1. Audrey Geffen, Keno Ferter and Frank Midtøy :)
- 2. Very useful insight into the process of doing research, both in terms of practical work and experimental planning (including FOTS Application)
- Pratical work.
- Audrey was a good teacher.

What do you think was the worst thing about this course?

- None
- To many students, lot of waiting time..
- Nothing
- Not fully understand why the course was called "etikk og velferd hos akvatiske organismer". I felt that we did a lot of things (that was fun), but I missed the link between the things we did and the purpose of the course. So after two days, I had done practical and fun things, and also wrote a application for laboratory animals, but I

did not understand why.

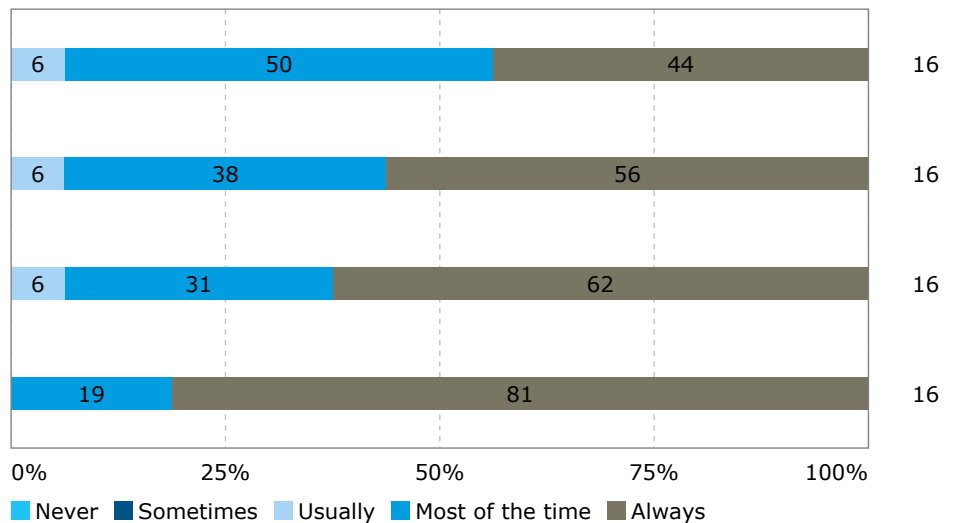

- Ineffective excersise on the 2nd course day.
- I felt that some of the reading overlapped to much with that of LAS203.
- 1. Some more course information should have been made available at the start of the semester (for example the course description gave "oral exam" as evaluation form)
- 2. Should have been 10 days, not 2
- No excursion.

What would you recommend to improve the instructor's performance?

- Try to link the things that we do in the course to animal welfare.
- Maybe get an extra assistant.
- She was good
- Couldn't be better
